SINTEF confirms that

Sole pressure safety valves

complies with the requirements in

- › EN 1489 (*)
- › EN 1254-2

Certificate holder

Sole AS
3359 Eggedal

Manufacturer

Sole AS
3359 Eggedal

Factory production control

The manufacturing of the product is subject to factory production control in accordance with the provisions in EN ISO/IEC 17065.

Product description

Sole pressure safety valves in dezincification resistance brass for water heaters with opening pressure 2.5, 3, 8, 9 and 10 bar. The valves are delivered with either compression ends, push fittings or threads.

The following models are included:

- › Sole 381
- › Sole 382
- › Sole 384
- › Sole 385
- › Sole 386
- › Sole 388

Performance requirements in TEK

Working pressure

The product meets the performance requirements at normal working pressure.

The product has been tested for 16 bar water pressure.

Other requirements

Marking

The product is marked with name or logo. The product may also be marked with the SINTEF certification mark as shown above. The mark may also be used on packaging and marketing materials concerning the certified product.

Dezincification resistance

The product has been tested for dezincification resistance according to EN ISO 6509.
